Cognosante advances critical customer missions by providing reliable cyber security, identity management services, enterprise infrastructure, and application services.

DoD, Intelligence, and Civilian agency customers partner with us because we understand the unique challenges in protecting the nation's borders, critical infrastructures, and citizen population. Critical to serving this community, we hold and maintain Top-Secret Facility Clearance and DCAA-approved Accounting System credentials.

OUR SECURITY CAPABILITIES:

**Cybersecurity.** Security vulnerabilities and breaches can lead to unplanned system downtime and mission degradation and a loss of confidence. Our multi-faceted, disciplined cyber approach enables our customers to maintain cyber readiness by applying state-of-the art cybersecurity technology, best practices in process, and governance standards. Our solutions include network and cloud security, information assurance and cybersecurity, enterprise application security, and secure coding expertise. Using DevSecOps best practices, we integrate system security features on day one, to deliver systems that are strongly immune to malicious attacks.

**Identity Management.** Customers face a dynamic environment with frequent new and changing threats, a need for leading edge technologies, an exponentially growing number of biometrics records, and an increasing demand for information sharing with our allies. We provide new identity management capabilities with improved system performance, reduced biometrics matching response times, and increased system capacity. We leverage modular and open system architectures to provide the system scalability and sustainability necessary to successfully accommodate biometrics requirements today and into the future.

**Enterprise Infrastructure.** Building a robust Enterprise IT Infrastructure demands a multi-dimensional approach that maximizes mission support. Our turn-key services approach integrates IT professionals with leading-edge technologies, repeatable processes, best practices rooted in our ISO 20000/ISO 9001/27001/HITRUST certifications verified by COALFIRE, and value-added tools and utilities. The result is not just a working, reliable system, but an organizational capability that enhances mission effectiveness. We align our IT capabilities with the mission and develop a visionary IT Roadmap to ensure our customers’ success.
Application Services. To outpace threats to our national security, customers need efficient solution delivery with predictable cadence and extremely high quality. We develop, deploy, and sustain software using best Agile, SAFe® and project management principles. Our solutions connect with commercial off-the-shelf platform implementations such as Salesforce, Microsoft Dynamics, Tableau, and InterSystems HealthShare; tailored for our customers’ unique and evolving requirements. We develop solutions from the ground up, delivering human-centered design and mobile user experiences that are fully integrated across existing systems with maximum scalability, elasticity, flexibility, and security.

OUR SECURITY SOLUTIONS:

- ITIL and IT Service Management (ITSM)
- SAN/NAS and Storage Administration
- Network Operations Centers (NOCs)
- Data Center Operations
- Virtualization and Infrastructure Consolidation
- Field Site Operations and Maintenance (O&M)
- Cloud Architecture/Migration
- DevOps/DevSecOps
- Agile Software Development
- Software Development
- Data Analytics
- Enterprise and Data Architecture
- Systems Engineering and Technical Assistance (SETA)
- IT Governance
- Major Systems Acquisition
- Business/Financial Management, Logistics, Training
- Cybersecurity
- Defensive Cyber Operations
- Information Assurance (IA)
- Security Certification and Accreditation (C&A)
- Security Assessment
- FISMA Compliance
- Forensics/Threat Analysis
- Mobility
- Biometrics

CERTIFICATIONS AND INDUSTRY RECOGNITION

Cognosante is committed to delivering the highest quality products and services for our customers. We have earned industry-leading and globally recognized certifications that demonstrate our repeatable, documented, and successful systems and processes.

CONTACT US TO LEARN MORE ABOUT HOW...

- We are optimizing cyber operations for the U.S. military, enabling our customer to receive a perfect score on the DISA Computer Network Defense Service Provider (CNDSP) inspection.
- We created an automated Biometric Identification System for use by the U.S. military in Afghanistan.
- We modernized the IT infrastructure, services, and operations to meet the business needs of a world class laboratory.
