

## Statewide Telehealth Solutions for Georgia K-12 Schools

Declining mental health rates and a range of health concerns facing youth today are directly impacting academic success in students of all ages. State school districts are facing a growing need to provide a wide range of medical services for large student populations while managing limited resources. From primary care to mental health and chronic disease management, school nurses are often on the front lines for students and their families.

Cognosante and strategic teammate ViTel Net, a leading national telehealth solution provider, understand the growing need for extended support and the ongoing budget cuts in school districts. We've partnered to deliver a turnkey, school-based telehealth solution for Georgia's K-12 schools that enables school staff to get greater access to clinical services and optimized support. The Cognosante team was selected by the State of Georgia to deliver comprehensive virtual care technology statewide with telehealth solutions powered by ViTel Net's vCareCommand platform.

### We Make It Easy for Schools and Universities to Deliver High Quality Healthcare So Students Can Get Back to Learning

Cognosante's telehealth solutions and services can be customized to any educational institution's needs:

#### Benefits

-  **Increased Academic Success:** Help support student wellness and success by enabling access to care for diverse student populations that are often challenged by distance, time, and socio-economic status.
-  **Easy Access to Enhanced Clinical Support:** Deliver specialized support for students by partnering with local experts to better address complex needs, including clinical care options for behavioral and mental health issues. Don't have a partnership with local clinicians? We can help.
-  **Reduced Overhead and Burn Out:** Empower school staff with extended clinical resources through partners that can help assess, validate, and improve care for students without the need to increase staff.

## Core Features

**Secure Collaboration:** Secure, live, multi-party videoconferencing and secure chat functionality for patient as well as school and clinical partner collaboration.

**Routing and Alerting:** Keep providers engaged and informed for efficient workflow with timely automated email and SMS notifications and alerts.

**Scheduling:** Streamline management of equipment, provider schedules and patient appointments across multiple clinics with multi-dimensional scheduling.

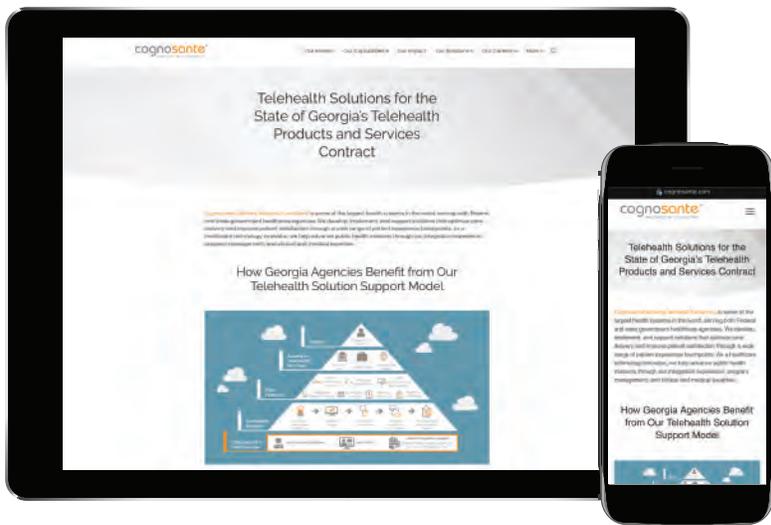

**Language Interpretation:** Optional human based, on-demand American Sign Language and spoken language interpretation in any video consult with just three clicks.

**Informed Consent Management:** Automate informed consent process with students' legal guardian electronic acceptance and record generation.
